

Grasshoppers – Second Grade

Scope and Sequence

Second grade is a time for review of the basic skills they have learned and growing upon those skills with new concepts. In this class we work hard to develop the whole child academically, socially, physically and spiritually. Our goal is to have each child feel like they are loved and they belong and through that sense of security stems learning. We work with each child individually to ensure they are growing in all areas of development. We partner with parents on this academic journey and give regular feedback.
